Partnerships with Businesses and Community Stakeholders

In recent years, Nottoway County Public Schools have sought partnerships with businesses and community stakeholders within the area. These partnerships provide opportunities for sharing talents, skills, and information between the school and the community or business group. Each partnership works together to support our mission statement and specific goals. Throughout the year, the partners interact through mutually beneficial activities.

NCPS has a number of community-business-educational partnerships and we would like to thank them for their support. They include:
